Shipping Workstation Interface

Many distributors use UPS World Ship or FedEx Ship Manager Workstation to process customer shipments.

The *ACCTivate!* Shipping Workstation Interface integrates directly with these facilities to provide order address information and collect package information.

- **UPS or FedEx system will request *ACCTivate!* Order Number and lookup address directly from *ACCTivate!* database**
- **UPS or FedEx system will automatically supply package tracking and shipping cost to *ACCTivate!***
- ***ACCTivate!* displays package details when order is invoiced**
- **Shipping cost may be selectively added to invoice**
- ***ACCTivate!* provides direct access to package tracking information**
- **Package tracking is available to customers through the Customer Self Service module**
