

Progression 7.7.200 Quality Fixes and Screen Changes

This document lists the corrections available in Progression 7.7.200. Corrections are grouped by package and are in Request Number order.

All component fixes are cumulative. For example, one bug request may show that version 1.0.8 of a .dll contains the fix, but the version in your installation shows version 1.0.10. If a bug request shows the fix was in version 1.0.8, it will also be in version 1.0.10.
