

## A Completely Integrated EDI Solution for Microsoft Dynamics

*An "All-In-One" EDI Solution from Data Masons makes it Simple and Cost Effective to Integrate EDI with Microsoft Dynamics*

Vantage Point EDI for Dynamics provides a complete EDI processing platform that enables Dynamics users to achieve both EDI integration and compliance in an efficient and cost effective manner.

Vantage Point includes everything you need for EDI compliance with virtually any trading partner, **without** 3<sup>rd</sup> party tools such as translators, mapping tools, labeling systems, etc. Compliance is managed for you by Data Masons. Our all-in-one approach allows for an easy implementation, efficient operation and provides premium support.

Vantage Point provides communication components to connect to a VAN mailbox or directly to your trading partners. It also includes a built-in translator, ASN packing system, EDI document management, UCC-128 label print engine, data entry templates for turnaround documents and business connectors for Microsoft Dynamics.

Built on Microsoft SQL Server using the latest .NET development tools, Vantage Point is a scalable, multi-user solution that will handle Enterprise Level EDI requirements. All inbound and outbound documents are stored in SQL in raw EDU format, structured parse tables and XML (within SQL) which provides virtually limitless options to access and leverage critical EDI data. Our design enables powerful EDI integration and compliance without modifications to your Dynamics ERP Solution.

Vantage Point EDI provides extensive EDI functionality such as a native ASN solution, third party warehouse EDI integration and solutions that enable e-business integration with your customers and suppliers thus enabling automation of your **entire** supply chain.

Finally, Vantage Point offers numerous industry firsts, such as the EDI Information Center™, Automated Processing, e-mail client for alerts, pre and post processing trigger systems and a Flash movie interface that makes the system user friendly and highly functional.

### Benefits for Vantage Point EDI Users

- Scalable and multi-user access provides Enterprise level EDI performance
- Enables EDI users to run EDI without transaction fees
- Advanced SAC allowance handling
- Partner specific error trapping helps reduce compliance errors and fines
- Trading partner kits can be purchased and installed in minutes via the web
- Easy to learn and use – based on a graphical workflow interface and alerts system
- Key documents are stored in XMI and SQL tables enabling powerful EDI data access
